DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Pande et al. (US 2004/0189517).

Regarding claim 1, Pande discloses a notice method for an emergency dispatch using a mobile communication device, comprising the steps of: a central control server system constructing step for controlling a transmission and receiving operation of an information; a member information database constructing step for storing a member information such as a name, age, cellular phone number, etc. of a member in cooperation with the central control server system; a position information database constructing step for storing a member's staying place and staying time in cooperation with the central control server system; a protection state start step for managing a member's staying place and staying time that is started by control of the central control server system; an emergency signal receiving step in which the central control server system receives an emergency signal from the member's mobile communication device; and a position information transmission step in which the central control server system which

receives the emergency signal transmits a member's basic information and position information to the mobile communication device of the dispatch staff. See paragraphs 31-33.

Regarding claim 2, Pande discloses wherein in said emergency signal receiving step, the member's mobile communication device transmits an emergency signal using a shortcut key of the member's mobile communication device or a previously set protocol. See paragraphs 31-33.

Regarding claim 3, Pande discloses wherein in said emergency signal receiving step, the member's mobile communication device receives a signal from a local area transmission device connected with the member's mobile communication device based on a wireless or wired method, and the member's mobile communication device transmits an emergency signal to the central control server system. See paragraphs 34 and 35.

Regarding claim 4, Pande discloses wherein in said emergency signal receiving step, the member's mobile communication devices receives a signal from an apparatus connected with the member's mobile communication device based on a wireless or wired method and designed to measure a member's body state, and the member's mobile communication device transmits an emergency signal to the central control server system. See paragraphs 34 and 35.

Regarding claim 5, Pande discloses wherein in said emergency signal receiving step, said member's mobile communication devices receives an intrusion detection signal from an intrusion detection sensor installed at a member's home, and the member's mobile communication device transmits an emergency signal to the central control server system. See paragraphs 34 and 35.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
